Black Loose Tea

Brewing Technique

1

Using a porcelain teapot and fresh water, bring the water to a boil.

2

Add one teaspoon of Ofçay to the teapot for each cup, add an extra spoon. When brewing the tea, pour the water from one point without moving it around over the tea.

3

After the water boils, remove it from the heat and wait a few minutes for the temperature to drop to 90° C.

4

Let it brew on low heat for 15-20 minutes. We recommend consuming your tea within half an hour after it has brewed.
